STAT

Dear Bill,

STAT

 has made or is making an extensive literature survey in connection with their

STAT

 work for you. In the course of the survey they have come up with some references on

STAT

stereo. Will you please ask Paul S. to request  to send me references from their survey on the following subjects:

- a.) The effect of stereo viewing on mensuration.
- b.) The effect of stereo on edge determination.

I need this information in connection with Task 2 of the present contract study. Today is the effective contract start date.

Regards,

STAT
